Uttara Apartment Project: Central LPG line for users?

Rajuk blames handover delay on lack of pipeline gas, plans alternative

The Rajuk in the same month will also issue final allotment letters to the purchasers of 1,344 more flats in 16 buildings in Sector-18 of Uttara. Construction of the buildings has already been completed, said Project Director ASM Raihanul Ferdous.

Each of the 1,654 square feet flats will have three bed rooms, a living-cum-dining room, four bathrooms, four verandas and a kitchen. That is priced at Tk 83 lakh, including a parking spot and utility connection charges.

There will be 84 flats in each of the 14-storey buildings. In the first phase, the city planner was expected to hand over the 840 flats to buyers in December last year, but it missed the deadline.

“We could not hand over the flats in time as we had to add some additional features to the buildings which were not in their original designs. Some complexities arising from the water and gas supply connections were also responsible for the delay,” the project director told The Daily Star.

The government has stopped prov
commercial buildings since 2010,

The Rajuk had been planning to set up LPG supply lines to the kitchens in the buildings. For that, engineers thought of installing a central Liquefied Petroleum Gas (LPG) storage system in the basements of each building. From there, piped LPG would be supplied to the flats.

Raihanul, also the chief project engineer, said they needed additional time to ensure safe installation of the LPG storage and supply line.

Under the project, 79 buildings are being built in Block-A, 52 in Block-B and 48 in Block-C of Sector-18 in Uttara, which will have a total of 15,036 flats. The project is being implemented on around 214 acres of land at a cost of over Tk 9,000 crore.

Rajuk sources said 900 flats were still unsold. The second phase of the flat handover in Block-A is likely to begin in June.

To ensure a clean environment in the project area, kitchen waste would be collected door-to-door by forming community-based cleaning teams.

Besides, a sewage treatment plant would be set up in the area to purify waste water before releasing it in the sewer system, added the sources.

Interior walls of the flats would be painted with plastic paint while the exterior walls would be protected with weather coat paint. There would be a reception and a lift lobby with mirror polished tiles in each of the buildings.

At least 10 people, including policemen, were hurt in a clash between law enforcers and local BNP leaders in Baghil area of Dhanbari, Tangail, yesterday.

Police fired 17 empty shells and used three tear gas shells to take control of the situation, officials said.

Sarkar Shaheed, former general secretary of Madhupur Upazila BNP, said three BNP men got shot and two others were injured in the incident.

Chand Miah, officer-in-charge of Dhanbari Police Station, told The Daily Star that police fired blank shots in self defence when the BNP men attacked them.

Five policemen were injured in the incident, he added.
